

Solar Hose Installation Steps:

Make up a hose fitting connection by hand on site in two minutes!

	<p>Step 1, Cut the Solar hose to your desired length with cutter</p>
	<p>Step2:Put a brass nut onto the solar hose firstly before putting the end of solar hose into flange tool</p>
	<p>Step3:Use a hammer to flatten the end of the solar hose Very important to get a flat end of the solar hose to realize the perfect sealing performance !</p>
	<p>Step4:squeeze the stainless steel Cir-clip on the Solar Hose</p>
 <p>1.solar hose 2.brass nut 3. Stainless Steel Cir-clip 4. Flat end of Solar Hose 5. 350°C resistance washer 6.flat end brass double nipple</p> 	<p>Step5 Screw the Brass nut ,washer and the brass double nipple together with spanner</p>
